

Cross-border data breach notification

Please use this form to notify a cross-border data breach.

Fields marked with an asterisk (*) must be filled in before submitting the application.

Supplementary information

If you are not able to answer all the questions at this stage, you may provide supplementary information later on but it is important that we receive the information without undue delay. If we don't receive any supplementary information within four weeks from the day we receive this data breach notification, decisions will be made based on existing information.

Important about cross-border data breaches

A data breach is cross-border if it has occurred in Sweden but also affects data subjects in other countries *or* if it has occurred in at least one other country other than Sweden. If you don't have your central administration in Sweden and the decisions on purpose and means for the processing are taken in another country than Sweden, you shall not send the notification to the Swedish Authority for Privacy Protection. The personal data breach shall instead be notified to the supervisory authority in the country where you have your main establishment. You can find a list of European data protection authorities at www.edpb.europa.eu.

More information about data breach notifications can be found on our website: www.imy.se/pui.

On our website you can also find information about how the Swedish Authority for Privacy Protection process your personal data.

The information in the report will become an official document

Everything you report will become an official document. This means that anyone can request access to the document, and the document might have to be disclosed depending on the outcome of an assessment of whether secrecy applies. The decision whether a document can be disclosed or not is always ultimately made by the Swedish Authority for Privacy Protection.

Therefore, we recommend that you only reply to the questions asked not providing more information than necessary in free text. Should you nevertheless choose to provide what you consider is confidential information, the free text field at the end of the form should be used to describe which information this applies to.
